

High Performance Technology Solutions

Competing in a truly global economy requires discipline, knowledge and experience. Our consulting practice is geared to add power to your company's performance. With expertise from the front desk to the back office we understand how to help you do more with your resources. Whatever your needs, we will help you find the most effective solution.

Leading the way to better solutions.

For more than a decade we have been a leader in technology consulting. We are in the unique position to offer a broad range of services that reflect both our array of industry experience and our past performance solving complex business challenges.

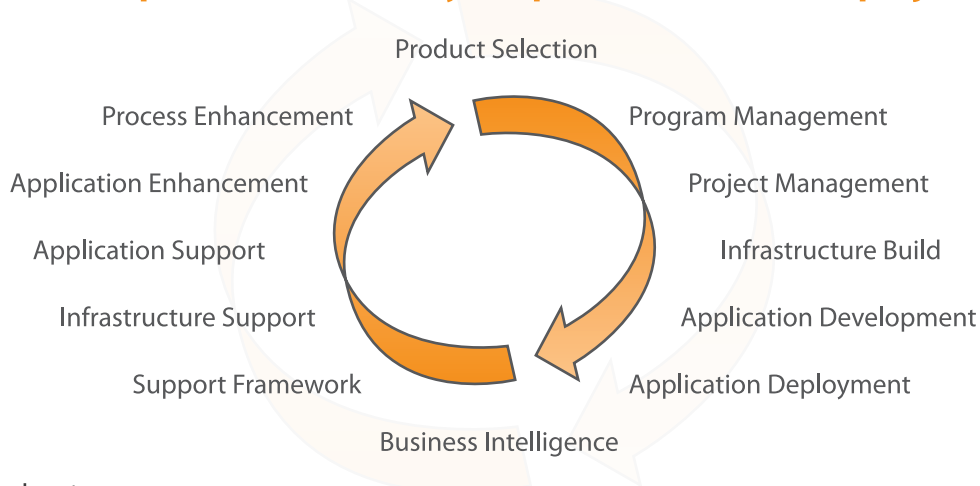

From sophisticated customer management to integrated supply chain solutions to transforming your business and internal functions, we have the expertise to get the job done—and get it done right.

The cornerstone of our Oracle and SAP practices are focused around providing a complete 360 solution suite.

Focused on providing strategic solutions and building client partnerships to solve complex business issues with a combination of packaged software, more efficient processes, and deep industry experience.

- Enterprise Resource Planning (ERP)
- Customer Relationship Management (CRM)
- Enterprise Application Integration (EAI)
- Business Intelligence (BI), Business Performance Management (BPM) and Data Marts
- Application and Database Upgrades

The Centroid Implementation Lifecycle spans the breadth of project phases.
