

We Specialize in

Optimizing the Oracle E-Business Suite on the Oracle Exadata Database Machine

The Oracle Exadata Database Machine is the only database machine that provides extreme performance for both data warehousing and online transaction processing applications, which makes it the ideal platform for consolidating onto grids or private clouds. Oracle Exadata is changing the way Executives are looking at their competition, strategy, and IT investments.

- How can I migrate without downtime?
- How do I set up parallel execution?
- How can I partition my data to optimize performance?
- Can hybrid columnar compression really reduce disk usage by 15x?
- How will it impact system performance?
- How can I obtain the maximum performance benefits?
- How can I load data without impacting availability and performance?
- What type of maintenance jobs do I need to ensure optimal performance over time?
- How can I structure my system for maximum availability?
- How can I effectively use the hardware and software support resources available to me?
- What do I need to consider when planning Oracle E-Business Suite migration to Oracle Exadata?

Take Advantage of the Centroid Exadata Center of Excellence

As a specialized Oracle Platinum Partner, Centroid has opened an Oracle Exadata Center of Excellence (COE) that can help your organization evaluate, deploy, and manage the Oracle E-Business Suite using an Exadata Database Machine. Consolidate your database tiers and achieve unparalleled database performance with Oracle Exadata.

By using our unique FutureProof methodologies, our own onsite Exadata Database Machine, and our new Center of Excellence (COE), our expert Centroid Exadata team can help you quickly and efficiently evaluate the Exadata solution using your own data and queries.

Centroid is the leader in extending the value of systems, information, and processes by protecting your business from future risk, uncertainty, and increased costs.

Our expert team will help measure ROI with Oracle Exadata, map business goals to Exadata solution opportunities, and help quantify the total cost of ownership of an Exadata enterprise solution.

Centroid will evaluate the benefits of Oracle Exadata for your environment, and then plan, deploy, migrate, and manage your critical database systems in an Oracle Exadata environment by using its Exadata Implementation and Migration Methodology (EIMM).

Specializations

- Oracle Database
- Oracle Database Performance Tuning
- Oracle Real Application Clusters
- Oracle Linux
- Oracle E-Business Suite Financials
- Oracle Accelerate for Midsize Companies

Join Us for the Oracle Exadata Summer Webinar Series

Every Tuesday at 1:30 p.m. Eastern

- **Storage Indexes** July 19th
- **IORM** July 26th
- **Migration Strategies** Aug 2nd
- **Patching and Upgrades** Aug 9th
- **From Order Book to Go-Live** Aug 16th
- **Monitoring** Aug 23rd

Register today by visiting:

We offer the following services dedicated to Oracle Exadata:

Proof of Value:

- Assess suitability of the platform for particular applications and workload
- Simulate real application traffic on the Oracle Exadata platform
- Identify application design gaps preventing you from taking full advantage of all Oracle Exadata features
- Validate the ROI of Oracle Exadata adoption
- Assessment, data, and application architecture and roadmap development
- Vendor selection
- Expert validation to minimize risk, accelerate readiness, ensure implementation success
- Benchmarking
- Overall project management
- System administration expertise/services
- Disaster recovery planning

Planning: Deployment:

- Performance testing and validation
- Consolidation configuration
- Oracle Exadata configuration
- Migration to Oracle Exadata from any database platform

Management:

- Ongoing operational and support services
- Monitoring Optimization
- Full reporting
