ORACLE®

	YES	NO	OTHER CHOICES	COMMENTS

TRUSTED

Does your cloud provider use a layered, unified security approach?

What steps is the provider taking to mitigate risk?

OTHER CHOICES
☐ Compliance / GDPR
☐ Industry Regulations
☐ 3rd Party Audits
☐ All of the Above

Can the provider show proof of capabilities? (i.e. security certifications, independent audits)

Comments

Does your cloud provider use a layered, unified security approach?

Question	YES	NO
Do you know where your data resides? (i.e. country and data center)	☐	☐
Does the cloud provider use one monolithic customer database or data isolation techniques hat are built-in to the service?	☐	☐
Does the cloud provider employ cloud experts who are knowledgeable about security throughout the entire technology stack?	☐	☐

How does your cloud provider support data integrity?

Comments

How do you transfer your data quickly and safely to get up and running in the cloud?

How do you make changes to the data structures (add fields, etc.) when needed?

In what format will you get your data if you decide to leave the service?

Instructions: If you answered "no" to more than half of these questions, you can benefit from a complete connected intelligent business solution. If commented answers suggest there is room for improvement, you may want to better understand the impact to modernizing your technology choices and the impact to your organization.

Oracle is here to help you with answers to all your cloud provider questions.
