Getting product to its destination is critical to your organization. Your goods have to be there on time, and you require visibility and control throughout the entire process. Oracle's suite of logistics solutions can help you do just that. With transportation and global trade management available on the Oracle Cloud you can deploy these best-in-class technologies in a fast and cost effective manner, achieve maximum business value with minimal risk, and improve your overall logistics operations.

ORACLE®

# Deliver Exceptional Service

With Oracle Transportation Management and Global Trade Management Cloud Services, you can deliver exceptional service to your customers with a single platform that provides end-to-end visibility and control of transportation, customs, and compliance processes.

# Go Global

Global trade and transportation from anywhere to everywhere create an increasing level of complexity in the challenges you face. Oracle Transportation Management and Global Trade Management Cloud Services enable you to plan and track multi-leg, multi-modal international shipments, then screen those shipments for global regulatory controls and licenses and manage the required customs processes, procedures, and documentation.

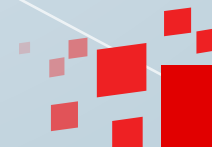

Oracle Transportation Management and Global Trade Management are delivered in the Oracle Cloud and available in multiple regional data centers which provide state of the art security, reliability and availability, supporting international data protection and privacy laws. And with a user interface that is available in 14 different languages and an unlimited number of currencies, you can easily support global operations.

*According to the latest WTO statistics, the amount of merchandise traded globally has increased by 143% in the last 10 years and has doubled each decade from 1983-2003.*

*85% of companies in a recent Aberdeen study report imports and 88% report export shipments.*

ORACLE®

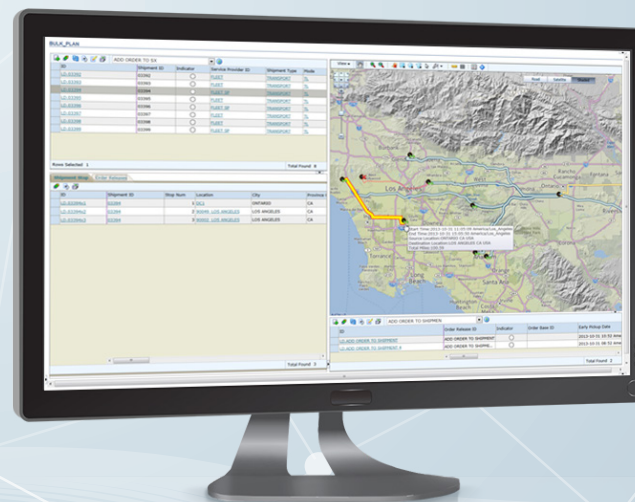

# Grow Your Business

*Deeply functional and highly configurable, Oracle Transportation Management and Global Trade Management Cloud Services enable customers to rapidly achieve ROI, then easily scale the solution to fit the needs of their growing business.*

A broad array of capabilities are built into OTM and GTM Cloud Services that enable you to configure business work flows, tasks, and processes to your specific needs. These features allow you to easily expand into new markets or regions that have unique or differing needs.

Dashboards are designed to allow you to manage by exception, rather than spend your time on data entry, enabling you to make strategic use of resources and focus your employees on solving problems rather than redundant data entry tasks.

*The multi-domain architecture of Oracle's single platform Transportation and Global Trade Cloud Service solutions allows you to execute locally and manage centrally, enabling support for diverse business processes across the globe.*

# See Into Your Supply Chain

Visualizing the progress of activities occurring in your supply chain is necessary for today's international businesses to operate. Oracle Transportation Management and Global Trade Management Cloud Services provide the visibility and mobility needed to stay in touch with your supply chain operations.

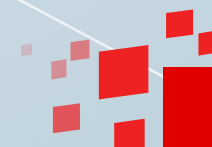

Embedded analytics and dashboards allow you to easily monitor and track key supply chain metrics and drill down to identify issues. From there you can directly take action to resolve issues and ensure the supply chain keeps moving.

*63% of companies in a recent Aberdeen study indicated supply chain visibility (SCV) was a high priority for improvement and another 28% indicated it was a medium priority.*

*Yet, according to Gartner, by 2016, less than 20% of companies will be able to provide end-to-end supply chain visibility.*

Mobile applications allow you and your partners to maintain visibility of your complex supply chains wherever they may be and enable you to perform key tasks and monitor performance metrics from the road.

ORACLE®

# Simplify With Cloud

Both Oracle Transportation Management and Global Trade Management are now available in the Oracle Cloud. In addition to software, Oracle provides you with the hardware and other infrastructure needed to begin configuring and using the applications right away. Oracle also performs the application and infrastructure upgrades so that you stay current with the latest versions of the software, with no additional upgrade costs.
