

CENTROID LIGHTNING

centroid
simplifying the cloud

client EPIC

situation
EPIC had acquired several companies, each with a different ERP system

impact
A failure to quickly consolidate disparate ERPs into a single platform would have left EPIC with disintegrated technology, astronomical ERP costs, and decentralized operations management.

resolution
Using Centroid Lightning, EPIC consolidated and migrated four disparate ERP systems to Oracle ERP Cloud in a matter of weeks. EPIC chose Oracle ERP Cloud over Microsoft Workday because Centroid Lightning reduced migration time and cost by more than 50%.

EPIC uses Centroid Lightning to consolidate four legacy ERPs into Oracle ERP Cloud... in a matter of weeks.

As a part of its strategic growth strategy, EPIC had successfully acquired several companies. Unfortunately, each of these companies were running different ERP systems.

A failure to quickly consolidate disparate ERPs into a single platform would have left EPIC with disintegrated technology, astronomical ERP costs, and decentralized technology and operations management. In order for EPIC to fully realize the benefits of their acquisitions, they needed to quickly consolidate all of the disparate legacy systems into a single, integrated ERP platform.

Using "Centroid Lightning," Centroid's proprietary cloud migration automation tool, Centroid helped EPIC consolidate and migrate its five disparate ERP systems to Oracle ERP Cloud in a matter of weeks. Additionally, EPIC now has a proven model for lightning-fast ERP consolidation as they continue to acquire more companies.
